COMPANY INTRODUCTION

Deling Construction Machinery

Deling focuses on practical forklifts, warehouse equipment and selected construction machinery for overseas buyers, distributors, contractors, factories and logistics companies.

Forklifts CORE PRODUCT FOCUS	B2B EXPORT SUPPLY MODEL	QC PRE-SHIPMENT INSPECTION
---	--	---

Our work covers product configuration, order coordination, quality inspection, export packing, container loading and long-term spare-parts communication. The goal is to provide equipment that matches the buyer's real working conditions rather than only a standard model name.

PRODUCT CAPABILITY

Focused Equipment Portfolio

The product range supports warehouse, factory, container-yard, outdoor and construction-site material handling.

Diesel forklifts

1.5-10 ton reference range for factory, yard and heavy-duty material handling.

Electric forklifts

Featured 2.5-3.5 ton counterbalanced models for warehouse and production logistics.

Rough terrain forklifts

Outdoor equipment for uneven yards, farms and construction sites.

Pallet trucks and stackers

Compact warehouse equipment for pallet transport and stacking.

Concrete delivery pumps

Trailer-mounted pumping solutions for building projects.

Custom configuration

Mast, tire, fork, attachment, cab, battery, engine and export options.

Customer group	Typical requirement
Forklift dealers and distributors	Product line, repeat supply, branding and spare parts
Machinery importers	Mixed equipment orders and export documentation
Manufacturing plants	Stable production material transfer
Warehouse and logistics companies	Pallet handling, loading and aisle efficiency
Rental companies	Durability, serviceability and parts support
Construction contractors	Outdoor handling and concrete delivery equipment

OPERATIONAL CAPABILITY

Order and Quality-Control Workflow

Clear checkpoints reduce configuration errors and improve delivery consistency.

Step	Capability
1. Requirement review	Capacity, load center, lift height, environment, options and destination requirements
2. Configuration confirmation	Model and options recorded before production or preparation
3. Manufacturing / assembly	Equipment prepared according to the approved order configuration
4. Functional inspection	Operation, safety devices, leakage, appearance and installed options
5. Export packing	Protection, accessory control, labels, lashing plan and documentation
6. Container loading	Loading sequence, weight distribution and photo record
7. After-sales communication	Manuals, spare parts and technical information

Manufacturing & Assembly
Equipment preparation and assembly

Quality Inspection

Protection and container-loading support

CONFIGURATION AND SERVICE

Support Before and After Shipment

The final specification is confirmed through the quotation and configuration record.

- **Model selection.** Recommendation based on load, site, aisle, lift height and duty cycle.
- **Option matching.** Mast, forks, tires, cab, side shifter, fork positioner and attachments.
- **Market adaptation.** Engine, emission, battery, charger, voltage, labels and documentation requirements.
- **Pre-delivery communication.** Photos, inspection records, packing list and shipping coordination.
- **Spare-parts support.** Consumable and maintenance parts can be included with the equipment order.
- **Technical documents.** Operation, maintenance and configuration information supplied according to the order.

Factory-direct communication

Fewer handoffs between inquiry, configuration, inspection and shipment.

Practical customization

Options are selected around the working condition and market requirement.

Export-oriented process

Packing, loading and documentation are planned for international delivery.

Long-term cooperation

Support for distributors, repeat orders, spare parts and product expansion.

Spare Parts & After-sales

Service communication and maintenance support

B2B Export Supply

Forklifts and material-handling equipment for global buyers
